- Data: How to Add/Edit/Delete  
[June 10th at 1pm](#)

## Learning Center

Find fast and simple answers to common questions. The revamped FAQs reflect recent issues experienced by users regarding:

- Add/Edit/Delete Data
- The People Piece
- B3 Metrics

## Launch B3 Benchmarking

Update meter readings, verify building data, and analyze your portfolio.

Launch B3

## ★Congratulations B3 Star Users!★

Like running a marathon, energy management takes dedication and commitment. Thirty-three B3 Star organizations have persevered with thorough energy benchmarking for over 10 years. The following hard-working organizations have 10+ years of meter readings with no warnings or errors within their data. Congratulations on doing such great work!

Anoka-Ramsey Community College, Coon Rapids  
Anoka Technical College  
Buffalo Public Schools Burnsville-Eagan-Savage Public Schools  
City of Woodbury  
Cambridge-Isanti Public Schools  
Dakota county

Ramsey County  
Ridgewater College, Willmar  
Riverland Community College, Austin  
Rochester Public Schools  
St. Cloud State University  
Winona State University  
Three Rivers Park District

## Featured FAQ:

### How do I delete a building or site?

If the building or site has been decommissioned or demolished, please create a new building version indicating this. The "Create Building Versions" [video](#) explains how to do this. If you have made an error and the building or site has never existed, please [Contact Us](#) to delete a building or site for you.

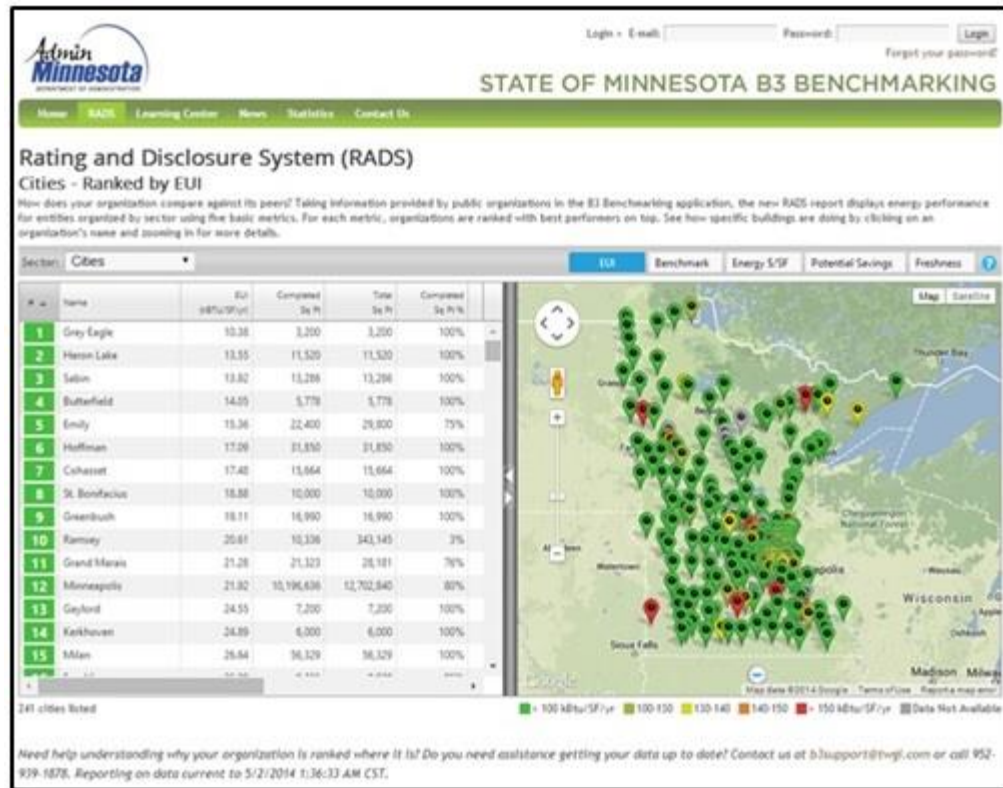

**"If you can't measure it, you can't manage it."**

B3 Benchmarking has been created by The Weidt Group and the State of Minnesota to help improve energy performance of buildings by tracking and managing facility.

South Washington County Schools  
St. Paul Public Schools

## MN Rating and Disclosure System is LIVE!

The [MN Rating and Disclosure System](#)(RADS) is now available on the RADS tab on the main MN Benchmarking site. This exciting new tool makes energy use transparent as now anyone can view the EUI, Benchmark, Potential Savings, and Completeness level of MN public buildings. Use these metrics to compare buildings in the following sectors available in the dropdown menu: cities, counties, state agencies, and schools, or program, such as GreenStep Cities.

## B3 Software Updates

Always looking to improve, we have recently developed the following features in the B3 application:

- Mark appropriate sites with **'Site contains no water meters'** in the Site Editor
- **Archive** energy documents in the Improvements tab
- **Transparent** completeness metric in the Reports gives immediate feedback on data quality
- Investigate **financing and support programs** on the Improvements tab

- New baseline on the Target comparison on the Reports tab helps you **assess the before and after** building performance that has undergone improvement projects
- **Site-level access** allows users to gain view or edit access to individual Sites within an Organization

## Improvement Report - What do you think?

The Improvement Report arrived via email to data owners and is available on the Improvements tab. This snapshot of your organization's energy performance, which will be archived in the application over time like a bank statement, is designed to help you identify specific sites for improvements based on Benchmark and Baseline analysis.

What do you think? Is it useful to you? What do you like or dislike? Let us know by emailing [B3support@twgi.com](mailto:B3support@twgi.com)!
